

## SEROCONVERSION PANELS

Seroconversion panels can help develop & validate your immunoassays.  
*Complete seroconversion profiles from negative to antibody positive.*

- Single-patient specimens serially collected through disease progression
- Unadulterated sodium citrate plasma
- Early detection of antigen and antibodies
- Over 160 different panels for HIV, HBV, HCV, EBV, and Zika

*Performing a quality control is the best way to ensure accurate test results, so using our range of quality control panels provides a benefit to both your patients and the reputation of your laboratory.*

QUALITY CONTROL PANELS
