

# *External Run Controls*

# **VISBY MEDICAL CONTROLS**

Our new CE Marked positive control **NATCTNGTV-POS-IVD** and **NATtrol CT/NG/TV** Negative Control have demonstrated performance on the **Visby Medical platform**

NATCTNGTV-POS-IVD

NATCTNGTV-NEG-IVD

NATtrol CT/NG/TV Negative Control (NATCTNGTV-NEG-IVD) is a qualitative in vitro diagnostic control intended to be used with molecular assays for the detection of *Chlamydia trachomatis*, *Neisseria gonorrhoeae* and *Trichomonas vaginalis* for the evaluation of test performance.

Control should be used according to an assay manufacturer's instructions. The routine use of external controls enables laboratories to monitor test variation, lot-to-lot test kit performance, operator variation, the effect of adverse environmental conditions, and can aid in the identification of random or systematic error.
